Journal of PHOTOCHEMISTRY AND PHOTOBIOLOGY B:BIOLOGY

Subject Index of Volume 36

Abscisic acid
  regulation of the *Arabidopsis thaliana* aquaporin gene AthH2 (PIP1b), 351
Adenylates
  response of magnesium chelatase activity in green pea (*Pisum sativum* L.) leaves to light, 5-aminolevulinic acid and dipyridyl supply, 17
Aerosol inhalation
  inhalation of 5-aminolevulinic acid: a new technique for fluorescence detection of early stage lung cancer, 169
Aggregates
  stability and scanning electron microscopy of Photofrin-II and Photosan-3, 139
δ-Aminolevulinic acid
  in-vitro investigation of ALA-induced protoporphyrin IX, 121
  perspectives in cutaneous photodynamic sensitization, 209
  topical photodynamic therapy in dermatology, 213
  electromotive diffusion (EMD) and photodynamic therapy with δ-aminolaevulinic acid (δ-ALA) for superficial bladder cancer, 233
5-Aminolevulinic acid
  response of magnesium chelatase activity in green pea (*Pisum sativum* L.) leaves to light, 5-aminolevulinic acid and dipyridyl supply, 17
  inhalation of 5-aminolevulinic acid: a new technique for fluorescence detection of early stage lung cancer, 169
5-Aminolevulinic acid biosynthesis
  kinetic studies on the glutamate:glyoxylate transaminase of *Euglena gracilis*, 241
Anaphylaxis
  unusual adverse reaction in a patient sensitized with Photosan 3, 183
Aquaporins
  regulation of the *Arabidopsis thaliana* aquaporin gene AthH2 (PIP1b), 351

Bilirubin ditaurate
  the effect of sensitizers on the rate constant of photodegradation of bilirubin ditaurate, 99
Biological clock
  light-independent endogenous circadian rhythm in the capacity for chlorophyll formation, 271
Biologically effective personal UV dosimetry
  biologically weighted personal UV dosimetry, 77
Bladder cancer
  electromotive diffusion (EMD) and photodynamic therapy with δ-aminolaevulinic acid (δ-ALA) for superficial bladder cancer, 233
Blood-brain barrier
  photodynamic therapy within edematous brain tissue: Considerations on sensitizer dose and time point of laser irradiation, 179
Blue light
  regulation of the *Arabidopsis thaliana* aquaporin gene AthH2 (PIP1b), 351
Brain edema
  photodynamic therapy within edematous brain tissue: Considerations on sensitizer dose and time point of laser irradiation, 179

Breast cancer
  photodynamic therapy of cutaneous metastases of breast cancer after local application of meso-tetra-(*para*-sulphophenyl)-porphin ($TPPS_4$), 205
Breast carcinoma
  photodynamic therapy with systemic administration of photosensitizers in dermatology, 225

Carotenoid
  energy transfer reactions involving carotenoids: quenching of chlorophyll fluorescence, 3
β,β- and β,ε-carotenoids
  the β,ε-carotenoid, lutein, is specifically required for the formation of the oligomeric forms of the light harvesting complex in the green alga, *scenedesmus obliquus*, 279
CCD camera
  in-vitro investigation of ALA-induced protoporphyrin IX, 121
Cell culture
  dynamic fluorescence changes during photodynamic therapy in vivo and in vitro of hydrophilic Al(III) phthalocyanine tetrasulphonate and lipophilic Zn(II) phthalocyanine administered in liposomes, 127
Cerebral malignancies
  photodynamic therapy in neurosurgery: a review, 157
Chlamydomonas reinhardtii
  secretory granules in the cytoplasm of a wall-less mutant of *Chlamydomonas reinhardtii* contain processed light-harvesting complex apoproteins and HSP70, 301
  contribution of lowered unsaturation levels of chloroplast lipids to high temperature tolerance of photosynthesis in *Chlamydomonas reinhardtii*, 333
Chl fluorescence
  energy transfer reactions involving carotenoids: quenching of chlorophyll fluorescence, 3
Chlorococcum littorale
  effects of high-CO_2 stress on photosystem II in a green alga, *Chlorococcum littorale*, which has a tolerance to high CO_2, 327
Chlorophyll
  natural products derived from plants as potential drugs for the photodynamic destruction of tumor cells, 95
  light-independent endogenous circadian rhythm in the capacity for chlorophyll formation, 271
Chlorophyll fluorescence
  effects of high-CO_2 stress on photosystem II in a green alga, *Chlorococcum littorale*, which has a tolerance to high CO_2, 327
Chlorophyllide
  the Shibata shift; effects of in vitro conditions on the spectral blue-shift of chlorophyllide in irradiated isolated prolamellar bodies, 263
Chlorophyll precursors
  the greening process in cress seedlings. V. Possible interference of chlorophyll precursors, accumulated after thujaplicin treatment, with light-regulated expression of Lhc genes, 255

Elsevier Science S.A.

Chloroplasts
light-independent endogenous circadian rhythm in the capacity for chlorophyll formation, 271
identification of two thylakoid-associated phosphatases with protein phosphatase activity in chloroplasts of the soybean (*Glycine max*), 313
Chloroplast development
secretory granules in the cytoplasm of a wall-less mutant of *Chlamydomonas reinhardtii* contain processed light-harvesting complex apoproteins and HSP70, 301
Chloroplast lipids
contribution of lowered unsaturation levels of chloroplast lipids to high temperature tolerance of photosynthesis in *Chlamydomonas reinhardtii*, 333
Chloroplast photodevelopment
changes in the polyamine content of plastidal membranes in light- and dark-grown wildtype and pigment mutants of the unicellular green alga *Scenedesmus obliquus* and their possible role in chloroplast photodevelopment, 293
Circadian rhythm
light-independent endogenous circadian rhythm in the capacity for chlorophyll formation, 271
Clp protease
does the Clp protease play a role during senescence-associated protein degradation in barley leaves?, 321
CO_2 concentration
effects of high-CO_2 stress on photosystem II in a green alga, *Chlorococcum littorale*, which has a tolerance to high CO_2, 327
Combined use of different photosensitizers
hypericin in phototherapy, 113
Cucumis sativus
comparative investigations of the effect of 5-aminolevulinate feeding on phytochrome and protochlorophyll(ide) content in dark-grown seedlings of barley, cucumber and cress, 245
Cycloheximide
response of magnesium chelatase activity in green pea (*Pisum sativum* L.) leaves to light, 5-aminolevulinic acid and dipyridyl supply, 17
Cytosolic granules
secretory granules in the cytoplasm of a wall-less mutant of *Chlamydomonas reinhardtii* contain processed light-harvesting complex apoproteins and HSP70, 301

Dermatology
experiences of photodynamic therapy in dermatology, 221
Desaturation
contribution of lowered unsaturation levels of chloroplast lipids to high temperature tolerance of photosynthesis in *Chlamydomonas reinhardtii*, 333
Determination of drugs
determination of photosan III in human plasma, 135
Dictyosomes
effects of UV irradiation on cell development and ultrastructure of the green alga *Micrasterias*, 285
Dihaematoporphyrin ether
photodynamic therapy in selected cases at the ENT Clinic, Innsbruck: case reports, 185
Dimethyl-(2,5)-methoxy-5-hydroperoxydihydrofuran
quantitative determination of singlet oxygen. Production by porphyrins, 109
2,5-Dimethylfuran
quantitative determination of singlet oxygen. Production by porphyrins, 109
2,2′-Dipyridyl
response of magnesium chelatase activity in green pea (*Pisum sativum* L.) leaves to light, 5-aminolevulinic acid and dipyridyl supply, 17
DNA
photoinduced electron transfer from nucleotides to DNA intercalating viologens A study by laser-flash photolysis and spectroelectrochemistry, 67
DNA damage
a mutant of Escherichia coli hyper-resistant to a number of DNA damaging agents: location of the mutational site, 47
DNA transfer
targeted gene transfer in eucaryotic cells by dye-assisted laser optoporation, 41
Drug delivery
photodynamic therapy within edematous brain tissue: Considerations on sensitizer dose and time point of laser irradiation, 179

Electromotive diffusion
electromotive diffusion (EMD) and photodynamic therapy with δ-aminolaevulinic acid (δ-ALA) for superficial bladder cancer, 233
Electron microscopy
secretory granules in the cytoplasm of a wall-less mutant of *Chlamydomonas reinhardtii* contain processed light-harvesting complex apoproteins and HSP70, 301
Endoplasmic reticulum
effects of UV irradiation on cell development and ultrastructure of the green alga *Micrasterias*, 285
Enveloped viruses
virucidal activity of pure singlet oxygen generated by thermolysis of a water-soluble naphthalene endoperoxide, 23
Etiolated seedlings
the greening process in cress seedlings. V. Possible interference of chlorophyll precursors, accumulated after thujaplicin treatment, with light-regulated expression of Lhc genes, 255
Etioplasts
the Shibata shift; effects of in vitro conditions on the spectral blue-shift of chlorophyllide in irradiated isolated prolamellar bodies, 263
Euglena gracilis
kinetic studies on the glutamate:glyoxylate transaminase of *Euglena gracilis*, 241
Extracellular factors
UVB irradiation-induced transcription from the long terminal repeat of intracisternal A particles and UVB-induced secretion of an extracellular factor that induces transcription of the intracisternal A particles in unirradiated cells, 61

Field-experiments
does the Clp protease play a role during senescence-associated protein degradation in barley leaves?, 321
Fluorescence
quenching of singlet oxygen ($^1\Delta_g$) by humic substances, 55
Fluorescence detection
inhalation of 5-aminolevulinic acid: a new technique for fluorescence detection of early stage lung cancer, 169
Fluorescence kinetics
dynamic fluorescence changes during photodynamic therapy in vivo and in vitro of hydrophilic Al(III) phthalocyanine tetrasulphonate and lipophilic Zn(II) phthalocyanine administered in liposomes, 127
picosecond time-resolved study on the nature of high-energy-state quenching in isolated pea thylakoids Different localization of zeaxanthin dependent and independent quenching mechanisms, 339
Fluorescence spectrophotometer and microscope
in-vitro investigation of ALA-induced protoporphyrin IX, 121
Fluorescence spectroscopy
dynamic fluorescence changes during photodynamic therapy in vivo and in vitro of hydrophilic Al(III) phthalocyanine tetrasulphonate and lipophilic Zn(II) phthalocyanine administered in liposomes, 127

Fluorescence spectrum
the Shibata shift; effects of in vitro conditions on the spectral blue-shift of chlorophyllide in irradiated isolated prolamellar bodies, 263

Gene transfer
targeted gene transfer in eucaryotic cells by dye-assisted laser optoporation, 41
Gibberellic acid
regulation of the *Arabidopsis thaliana* aquaporin gene AthH2 (PIP1b), 351
Glutamate:4,5-dioxovalerate trasaminase
kinetic studies on the glutamate:glyoxylate transaminase of *Euglena gracilis*, 241
Glutamate:glyoxylate transaminase
kinetic studies on the glutamate:glyoxylate transaminase of *Euglena gracilis*, 241
Gynaecological cancers
photodynamic therapy in gynaecological neoplastic diseases, 193
Gynaecologic cancer
photodynamic therapy in gynaecologic cancer, 189

Haematoporphyrin derivative
photodynamic therapy in neurosurgery: a review, 157
Hamster cheek pouch
measurements by fluorescence microscopy of the time-dependent distribution of meso-tetra-hydroxyphenylchlorin in healthy tissues and chemically induced "early" squamous cell carcinoma of the Syrian hamster cheek pouch, 143
Head and neck cancer
photodynamic treatment for cancers of the head and neck, 175
photodynamic therapy in selected cases at the ENT Clinic, Innsbruck: case reports, 185
Healthy mucosa
measurements by fluorescence microscopy of the time-dependent distribution of meso-tetra-hydroxyphenylchlorin in healthy tissues and chemically induced "early" squamous cell carcinoma of the Syrian hamster cheek pouch, 143
Heat-shock proteins
secretory granules in the cytoplasm of a wall-less mutant of *Chlamydomonas reinhardtii* contain processed light-harvesting complex apoproteins and HSP70, 301
Hematoporphyrin derivative
topical photodynamic therapy in dermatology, 213
photodynamic therapy with systemic administration of photosensitizers in dermatology, 225
High-energy state quenching
picosecond time-resolved study on the nature of high-energy-state quenching in isolated pea thylakoids Different localization of zeaxanthin dependent and independent quenching mechanisms, 339
High temperature tolerance
contribution of lowered unsaturation levels of chloroplast lipids to high temperature tolerance of photosynthesis in *Chlamydomonas reinhardtii*, 333
Homovanillic acid
quantitative determination of singlet oxygen. Production by porphyrins, 109
Hordeum vulgare
does the Clp protease play a role during senescence-associated protein degradation in barley leaves?, 321
Hordeum vulgare L.
comparative investigations of the effect of 5-aminolevulinate feeding on phytochrome and protochlorophyll(ide) content in dark-grown seedlings of barley, cucumber and cress, 245
Human fibroblasts
in-vitro investigation of ALA-induced protoporphyrin IX, 121
Humic substances
quenching of singlet oxygen ($^1\Delta_g$) by humic substances, 55

Hydrophilic $AlPcS_4$
dynamic fluorescence changes during photodynamic therapy in vivo and in vitro of hydrophilic Al(III) phthalocyanine tetrasulphonate and lipophilic Zn(II) phthalocyanine administered in liposomes, 127
Hyper DNA repair
a mutant of Escherichia coli hyper-resistant to a number of DNA damaging agents: location of the mutational site, 47
Hypericin
wavelength-dependent photoresponse of biological and aqueous model systems using the photodynamic plant pigment hypericin, 103
hypericin in phototherapy, 113
Hypersensitive skin reaction
unusual adverse reaction in a patient sensitized with Photosan 3, 183

Inflammatory skin diseases
topical photodynamic therapy in dermatology, 213
Intracisternal A particles
UVB irradiation-induced transcription from the long terminal repeat of intracisternal A particles and UVB-induced secretion of an extracellular factor that induces transcription of the intracisternal A particles in unirradiated cells, 61
Intravesical therapy
electromotive diffusion (EMD) and photodynamic therapy with δ-aminolaevulinic acid (δ-ALA) for superficial bladder cancer, 233

Kaposi's sarcoma
photodynamic therapy with systemic administration of photosensitizers in dermatology, 225

Laser
targeted gene transfer in eucaryotic cells by dye-assisted laser optoporation, 41
photodynamic treatment for cancers of the head and neck, 175
photodynamic therapy in selected cases at the ENT Clinic, Innsbruck: case reports, 185
Laser/$TPPS_4$ therapy
photodynamic therapy of cutaneous metastases of breast cancer after local application of meso-tetra-(*para*-sulphophenyl)-porphin ($TPPS_4$), 205
Laser flash photolysis
quenching of singlet oxygen ($^1\Delta_g$) by humic substances, 55
Laser photolysis
photoinduced electron transfer from nucleotides to DNA intercalating viologens A study by laser-flash photolysis and spectroelectrochemistry, 67
Lepidium sativum L.
the greening process in cress seedlings. V. Possible interference of chlorophyll precursors, accumulated after thujaplicin treatment, with light-regulated expression of Lhc genes, 255
Lepidium sativum L. Fluorescence spectroscopy
comparative investigations of the effect of 5-aminolevulinate feeding on phytochrome and protochlorophyll(ide) content in dark-grown seedlings of barley, cucumber and cress, 245
Lhc gene (=cab gene) transcripts
the greening process in cress seedlings. V. Possible interference of chlorophyll precursors, accumulated after thujaplicin treatment, with light-regulated expression of Lhc genes, 255
LHC II
identification of two thylakoid-associated phosphatases with protein phosphatase activity in chloroplasts of the soybean (*Glycine max*), 313
Light delivery device
systems for light application and dosimetry in photodynamic therapy, 153
Light dosimetry
systems for light application and dosimetry in photodynamic therapy, 153

Light-harvesting complex
the β,ϵ-carotenoid, lutein, is specifically required for the formation of the oligomeric forms of the light harvesting complex in the green alga, *scenedesmus obliquus*, 279
Light-harvesting complex apoproteins
secretory granules in the cytoplasm of a wall-less mutant of *Chlamydomonas reinhardtii* contain processed light-harvesting complex apoproteins and HSP70, 301
Liposomal ZnPc
dynamic fluorescence changes during photodynamic therapy in vivo and in vitro of hydrophilic Al(III) phthalocyanine tetrasulphonate and lipophilic Zn(II) phthalocyanine administered in liposomes, 127
Local therapy of cancer
photodynamic therapy of cutaneous metastases of breast cancer after local application of meso-tetra-(*para*-sulphophenyl)-porphin ($TPPS_4$), 205
Long terminal repeat
UVB irradiation-induced transcription from the long terminal repeat of intracisternal A particles and UVB-induced secretion of an extracellular factor that induces transcription of the intracisternal A particles in unirradiated cells, 61
Lung cancer
inhalation of 5-aminolevulinic acid: a new technique for fluorescence detection of early stage lung cancer, 169
photodynamic therapy in lung cancer. A review, 199
Lysosomes
dynamic fluorescence changes during photodynamic therapy in vivo and in vitro of hydrophilic Al(III) phthalocyanine tetrasulphonate and lipophilic Zn(II) phthalocyanine administered in liposomes, 127

Mg-chelatase
response of magnesium chelatase activity in green pea (*Pisum sativum* L.) leaves to light, 5-aminolevulinic acid and dipyridyl supply, 17
Micelles
stability and scanning electron microscopy of Photofrin-II and Photosan-3, 139
Micrasterias
effects of UV irradiation on cell development and ultrastructure of the green alga *Micrasterias*, 285
Microtubules
effects of UV irradiation on cell development and ultrastructure of the green alga *Micrasterias*, 285
Mutations of *Scenedesmus obliquus*
the β,ϵ-carotenoid, lutein, is specifically required for the formation of the oligomeric forms of the light harvesting complex in the green alga, *scenedesmus obliquus*, 279

NADPH-protochlorophyllide oxidoreductase
the Shibata shift; effects of in vitro conditions on the spectral blue-shift of chlorophyllide in irradiated isolated prolamellar bodies, 263
Naphthalene carrier
virucidal activity of pure singlet oxygen generated by thermolysis of a water-soluble naphthalene endoperoxide, 23
Naphthalene endoperoxides
water-soluble naphthalene derivatives as singlet oxygen ($^1O_2$, $^1\Delta_g$) carriers for biological media, 31
N,N'-Dialkylated 6-(2-pyridyl)phenanthridines
photoinduced electron transfer from nucleotides to DNA intercalating viologens A study by laser-flash photolysis and spectroelectrochemistry, 67
Non-photochemical quenching
energy transfer reactions involving carotenoids: quenching of chlorophyll fluorescence, 3

Nucleotides
photoinduced electron transfer from nucleotides to DNA intercalating viologens A study by laser-flash photolysis and spectroelectrochemistry, 67

Occupational UV measurements
biologically weighted personal UV dosimetry, 77
OEC23 protein
affinity labeling by ATP and GTP of the nuclear encoded OEC23 protein of the photosystem II oxygen evolving complex, 307
Optoporation
targeted gene transfer in eucaryotic cells by dye-assisted laser optoporation, 41

PDT
stability and scanning electron microscopy of Photofrin-II and Photosan-3, 139
photodynamic treatment for cancers of the head and neck, 175
PDT/$TPPS_4$ therapy
photodynamic therapy of cutaneous metastases of breast cancer after local application of meso-tetra-(*para*-sulphophenyl)-porphin ($TPPS_4$), 205
Pea (*Pisum sativum* L.)
response of magnesium chelatase activity in green pea (*Pisum sativum* L.) leaves to light, 5-aminolevulinic acid and dipyridyl supply, 17
ΔpH-dependence
picosecond time-resolved study on the nature of high-energy-state quenching in isolated pea thylakoids Different localization of zeaxanthin dependent and independent quenching mechanisms, 339
Photobleaching
dynamic fluorescence changes during photodynamic therapy in vivo and in vitro of hydrophilic Al(III) phthalocyanine tetrasulphonate and lipophilic Zn(II) phthalocyanine administered in liposomes, 127
Photodynamic cancer therapy
natural products derived from plants as potential drugs for the photodynamic destruction of tumor cells, 95
Photodynamic therapy
quantitative determination of singlet oxygen. Production by porphyrins, 109
hypericin in phototherapy, 113
dynamic fluorescence changes during photodynamic therapy in vivo and in vitro of hydrophilic Al(III) phthalocyanine tetrasulphonate and lipophilic Zn(II) phthalocyanine administered in liposomes, 127
determination of photosan III in human plasma, 135
systems for light application and dosimetry in photodynamic therapy, 153
photodynamic therapy in neurosurgery: a review, 157
photodynamic treatment for cancers of the head and neck, 175
photodynamic therapy within edematous brain tissue: Considerations on sensitizer dose and time point of laser irradiation, 179
unusual adverse reaction in a patient sensitized with Photosan 3, 183
photodynamic therapy in gynaecologic cancer, 189
photodynamic therapy in gynaecological neoplastic diseases, 193
photodynamic therapy in lung cancer. A review, 199
perspectives in cutaneous photodynamic sensitization, 209
topical photodynamic therapy in dermatology, 213
experiences of photodynamic therapy in dermatology, 221
photodynamic therapy with systemic administration of photosensitizers in dermatology, 225
electromotive diffusion (EMD) and photodynamic therapy with δ-aminolaevulinic acid (δ-ALA) for superficial bladder cancer, 233
Photofrin
tumour photosensitizers: approaches to enhance the selectivity and efficiency of photodynamic therapy, 87

photodynamic therapy with systemic administration of photosensitizers in dermatology, 225
Photofrin-II
stability and scanning electron microscopy of Photofrin-II and Photosan-3, 139
Photoinduced electron transfer
photoinduced electron transfer from nucleotides to DNA intercalating viologens A study by laser-flash photolysis and spectroelectrochemistry, 67
Photoinhibition
effects of high-CO_2 stress on photosystem II in a green alga, *Chlorococcum littorale*, which has a tolerance to high CO_2, 327
Photoirradiation therapy
photodynamic therapy in selected cases at the ENT Clinic, Innsbruck: case reports, 185
Photooxidation
the effect of sensitizers on the rate constant of photodegradation of bilirubin ditaurate, 99
Photosan-3
stability and scanning electron microscopy of Photofrin-II and Photosan-3, 139
Photosan III
determination of photosan III in human plasma, 135
Photosensitizers
the effect of sensitizers on the rate constant of photodegradation of bilirubin ditaurate, 99
measurements by fluorescence microscopy of the time-dependent distribution of meso-tetra-hydroxyphenylchlorin in healthy tissues and chemically induced "early" squamous cell carcinoma of the Syrian hamster cheek pouch, 143
perspectives in cutaneous photodynamic sensitization, 209
Photosynthesis
energy transfer reactions involving carotenoids: quenching of chlorophyll fluorescence, 3
does the Clp protease play a role during senescence-associated protein degradation in barley leaves?, 321
Photosystem II
affinity labeling by ATP and GTP of the nuclear encoded OEC23 protein of the photosystem II oxygen evolving complex, 307
effects of high-CO_2 stress on photosystem II in a green alga, *Chlorococcum littorale*, which has a tolerance to high CO_2, 327
contribution of lowered unsaturation levels of chloroplast lipids to high temperature tolerance of photosynthesis in *Chlamydomonas reinhardtii*, 333
picosecond time-resolved study on the nature of high-energy-state quenching in isolated pea thylakoids Different localization of zeaxanthin dependent and independent quenching mechanisms, 339
Phytochrome
comparative investigations of the effect of 5-aminolevulinate feeding on phytochrome and protochlorophyll(ide) content in dark-grown seedlings of barley, cucumber and cress, 245
Pigment mutants
changes in the polyamine content of plastidal membranes in light- and dark-grown wildtype and pigment mutants of the unicellular green alga *Scenedesmus obliquus* and their possible role in chloroplast photodevelopment, 293
Plastidal membranes
changes in the polyamine content of plastidal membranes in light- and dark-grown wildtype and pigment mutants of the unicellular green alga *Scenedesmus obliquus* and their possible role in chloroplast photodevelopment, 293
Polyamine
changes in the polyamine content of plastidal membranes in light- and dark-grown wildtype and pigment mutants of the unicellular green alga *Scenedesmus obliquus* and their possible role in chloroplast photodevelopment, 293
Polysulphone film
biologically weighted personal UV dosimetry, 77
Porphyrins
stability and scanning electron microscopy of Photofrin-II and Photosan-3, 139
perspectives in cutaneous photodynamic sensitization, 209
Prolamellar body
the Shibata shift; effects of in vitro conditions on the spectral blue-shift of chlorophyllide in irradiated isolated prolamellar bodies, 263
Promoter activity
regulation of the *Arabidopsis thaliana* aquaporin gene AthH2 (PIP1b), 351
Protein degradation
does the Clp protease play a role during senescence-associated protein degradation in barley leaves?, 321
Protein phosphatases
identification of two thylakoid-associated phosphatases with protein phosphatase activity in chloroplasts of the soybean (*Glycine max*), 313
Protochlorophyll
light-independent endogenous circadian rhythm in the capacity for chlorophyll formation, 271
Protochlorophyllide
comparative investigations of the effect of 5-aminolevulinate feeding on phytochrome and protochlorophyll(ide) content in dark-grown seedlings of barley, cucumber and cress, 245
the Shibata shift; effects of in vitro conditions on the spectral blue-shift of chlorophyllide in irradiated isolated prolamellar bodies, 263
Protoporphyrin IX
in-vitro investigation of ALA-induced protoporphyrin IX, 121
psbP
affinity labeling by ATP and GTP of the nuclear encoded OEC23 protein of the photosystem II oxygen evolving complex, 307
Psoriasis
photodynamic therapy with systemic administration of photosensitizers in dermatology, 225
P. vulgaris
light-independent endogenous circadian rhythm in the capacity for chlorophyll formation, 271

Quenching mechanism
photoinduced electron transfer from nucleotides to DNA intercalating viologens A study by laser-flash photolysis and spectroelectrochemistry, 67

Rat bladder tumour model
dynamic fluorescence changes during photodynamic therapy in vivo and in vitro of hydrophilic Al(III) phthalocyanine tetrasulphonate and lipophilic Zn(II) phthalocyanine administered in liposomes, 127
Regulation
identification of two thylakoid-associated phosphatases with protein phosphatase activity in chloroplasts of the soybean (*Glycine max*), 313
Relocalization
dynamic fluorescence changes during photodynamic therapy in vivo and in vitro of hydrophilic Al(III) phthalocyanine tetrasulphonate and lipophilic Zn(II) phthalocyanine administered in liposomes, 127

Scenedesmus obliquus
changes in the polyamine content of plastidal membranes in light- and dark-grown wildtype and pigment mutants of the unicellular green alga *Scenedesmus obliquus* and their possible role in chloroplast photodevelopment, 293

Seed germination
light-independent endogenous circadian rhythm in the capacity for chlorophyll formation, 271
Senescence
does the Clp protease play a role during senescence-associated protein degradation in barley leaves?, 321
Shibata shift
the Shibata shift; effects of in vitro conditions on the spectral blue-shift of chlorophyllide in irradiated isolated prolamellar bodies, 263
Side effects
unusual adverse reaction in a patient sensitized with Photosan 3, 183
Singlet oxygen
virucidal activity of pure singlet oxygen generated by thermolysis of a water-soluble naphthalene endoperoxide, 23
water-soluble naphthalene derivatives as singlet oxygen ($^1O_2$, $^1\Delta_g$) carriers for biological media, 31
natural products derived from plants as potential drugs for the photodynamic destruction of tumor cells, 95
the effect of sensitizers on the rate constant of photodegradation of bilirubin ditaurate, 99
Singlet oxygen carriers
water-soluble naphthalene derivatives as singlet oxygen ($^1O_2$, $^1\Delta_g$) carriers for biological media, 31
Singlet oxygen quenching
quenching of singlet oxygen ($^1\Delta_g$) by humic substances, 55
Skin cancer
topical photodynamic therapy in dermatology, 213
photodynamic therapy with systemic administration of photosensitizers in dermatology, 225
Solar UV exposure
biologically weighted personal UV dosimetry, 77
SOS genes
a mutant of Escherichia coli hyper-resistant to a number of DNA damaging agents: location of the mutational site, 47
Soybean
identification of two thylakoid-associated phosphatases with protein phosphatase activity in chloroplasts of the soybean (*Glycine max*), 313
Spinach thylakoids
affinity labeling by ATP and GTP of the nuclear encoded OEC23 protein of the photosystem II oxygen evolving complex, 307
Squamous cell carcinoma (SCC)
measurements by fluorescence microscopy of the time-dependent distribution of meso-tetra-hydroxyphenylchlorin in healthy tissues and chemically induced "early" squamous cell carcinoma of the Syrian hamster cheek pouch, 143
Stability
stability and scanning electron microscopy of Photofrin-II and Photosan-3, 139
Synchronizer
light-independent endogenous circadian rhythm in the capacity for chlorophyll formation, 271

Tetrasodium-mesotetraphenyl-porphinesulfonate
topical photodynamic therapy in dermatology, 213
Thujaplicin
the greening process in cress seedlings. V. Possible interference of chlorophyll precursors, accumulated after thujaplicin treatment, with light-regulated expression of Lhc genes, 255
Thylakoids
light-independent endogenous circadian rhythm in the capacity for chlorophyll formation, 271
identification of two thylakoid-associated phosphatases with protein phosphatase activity in chloroplasts of the soybean (*Glycine max*), 313
$TPPS_4$ cancer therapy
photodynamic therapy of cutaneous metastases of breast cancer after local application of meso-tetra-(*para*-sulphophenyl)-porphin ($TPPS_4$), 205
Transcription
UVB irradiation-induced transcription from the long terminal repeat of intracisternal A particles and UVB-induced secretion of an extracellular factor that induces transcription of the intracisternal A particles in unirradiated cells, 61
Transfection
targeted gene transfer in eucaryotic cells by dye-assisted laser optoporation, 41
Tumors
photodynamic therapy in gynaecological neoplastic diseases, 193
Tumour photosensitizers
tumour photosensitizers: approaches to enhance the selectivity and efficiency of photodynamic therapy, 87

Ultrastructure
effects of UV irradiation on cell development and ultrastructure of the green alga *Micrasterias*, 285
UV
effects of UV irradiation on cell development and ultrastructure of the green alga *Micrasterias*, 285
UVB-irradiation
UVB irradiation-induced transcription from the long terminal repeat of intracisternal A particles and UVB-induced secretion of an extracellular factor that induces transcription of the intracisternal A particles in unirradiated cells, 61
UV-induced affinity labeling by ATP and GTP
affinity labeling by ATP and GTP of the nuclear encoded OEC23 protein of the photosystem II oxygen evolving complex, 307

Viologens
photoinduced electron transfer from nucleotides to DNA intercalating viologens A study by laser-flash photolysis and spectroelectrochemistry, 67
Viral inactivation
virucidal activity of pure singlet oxygen generated by thermolysis of a water-soluble naphthalene endoperoxide, 23

Wavelength-dependent photoresponse
wavelength-dependent photoresponse of biological and aqueous model systems using the photodynamic plant pigment hypericin, 103

Xanthophyll cycle
energy transfer reactions involving carotenoids: quenching of chlorophyll fluorescence, 3

Zeaxanthin
picosecond time-resolved study on the nature of high-energy-state quenching in isolated pea thylakoids Different localization of zeaxanthin dependent and independent quenching mechanisms, 339
